ENTERPRISE PORTFOLIO

TEAM SWIFT BLUR

TEAM MEMBERS

TEAM MANAGER
RAHYANATH MAHAROOF

Rahyanath is a remarkable leader who was a source of unwavering support and motivation for the team. Her effective communication and delegation ensured that all members work together to achieve our goals. Under her leadership, Team Swift Blur was able to thrive and achieve astounding results.

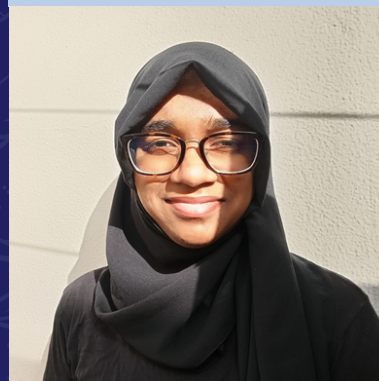

DESIGN ENGINEER
KAUSHIK SARAVANAN

Kaushik possesses a unique combination of exceptional technical ability and unparalleled creative flair. His desire to strive towards perfection is clearly visible in our car, as he defied our expectations at every turn, improving our car to levels we didn't think were possible.

MANUFACTURING ENGINEER
AALIA RUMANA

Aalia is a knowledgeable manufacturing engineer with a deep understanding of the manufacturing process. Her expertise in material selection and final manufacturing of the car is what turned hours of our effort into a tangible and excellent end product.

MARKETING AND SPONSORSHIP MANAGER
RIDDHI KAPADIA

Riddhi, our dynamic marketing and sponsorship manager, is the heart of our team. She has captured the attention of thousands and bought in numerous fans for Swift Blur. Her ability to build strong partnerships with sponsors, secure funding and promote the team brand has been pivotal to our success.

RESOURCE MANAGER
DANIEL THOMAS

Daniel, our resource manager, effectively manages the resources required for the project, approves and looks around for substitutes to save money, and handles the accounting. He identifies potential issues and solutions to ensure timely completion of the project within budget.

GRAPHIC DESIGNER
ANANNYA KARTHIK

Anannya is our graphic designer who is able to bring ideas to life through her designs. Her versatility in working with multiple software programs allowed her to create visually appealing designs where ever needed. She has also put in an exemplary effort in creating our wonderful pit display.

RAMBO

We take pride in our mascot, Rambo. He has been made of recyclable materials like used paper from newspapers, magazines, cardboard, and plastic bottles. During our intra-school round, we collected the waste plastic bottles and used them to further modify our mascot.

We chose falcon to be our mascot because it symbolizes victory and longevity, two characteristics that our team wishes to embody. Much like the falcon, we wish to have a car that is as fast as a falcon.

ABOUT THE NAME >>

We are a dedicated and ambitious group of six 12th-grade students who have used our collaborative spirit and drive for innovation to push our boundaries in the F1 in Schools competition. Our team is built upon a shared commitment to continuous improvement, embracing challenges, and working together to overcome them.

BEHIND THE NAME >>

The team name "Swift Blur" has a double meaning. It showcases our aspiration to build a car so fast it blurs right past you. The team name also symbolizes our the standout qualities of our team members, who are quick and agile. These traits help Team Swift Blur navigate the challenging and fast-paced world of F1 in Schools.

SCOPE STATEMENT >>

Every organization needs a goal. Upon creating the team, we also created a scope statement. This scope statement served as a reference point for the team, as it lists our objectives and how we intend to achieve them.

"Team Swift Blur intends to push the boundaries of what is thought to be possible by excelling in the F1 in Schools competition, specifically targeting the nationals round. We aim to build upon our success in the intra-school round and carry out holistic improvement plans across all aspects of the competition. Through careful planning, dedication, and a winning mentality, we strive to bag top honors in the national rounds of the competition, and establish Team Swift Blur as a true force to be reckoned with."

Developing a team identity helps create a sense of belonging amongst our team and allows us to identify as one, as we work together, and is therefore a crucial process in strengthening our team. Our identity has been used in every aspect of this competition, from team uniform to the car itself. These colors represent Swift Blur and are integral to the team brand.

TEAM UNIFORM

Our team's uniform combines navy blue, yellow, and white for a striking and unified look. We have a white tshirt to ensure simplicity and a jacket comprising of our team colors for both style and performance. It allows our team members to showcase their unity and competitive spirit, while also being comfortable.

TEAM LOGO

Our logo is the epitome of simplicity. This minimalistic logo ensures an elegant yet meaningful portrayal of our team. The yellow-white combination shows our mascot, the falcon, which symbolizes our fearless vision and vitality.

**BLURRING
THE LINES
OF SIGHT**

TEAM MOTTO

We foresee our car to be as fast as the speed of light, conquering every obstacle it encounters on its way. It also brings out the meaning of how we as a team have blurred out all our challenges and have emerged as sharp as the rays of light.

IMPROVE

Team Swift Blur strives to be perfect. We're always learning from our past efforts and searching for ways to improve and be better. We always give our best in every aspect and believe that our results speak for who we are as a team.

ADAPT

Our team aims to work as efficiently as possible. With all the obstacles that come our way, we learn to adapt and work around them all while solving the issues as a team.

INSPIRE

We aim to leave a strong lasting impression that helps inspire young minds and encourage them to join the F1 in Schools initiative. We are grateful to be given this opportunity and would love to spread the word about it.

VERSATILE

Our team is comprised of six versatile members, each possessing different skill sets that help us stand out from the rest. Gathering such skill sets together allows us to produce top-notch results.

FLEXIBLE

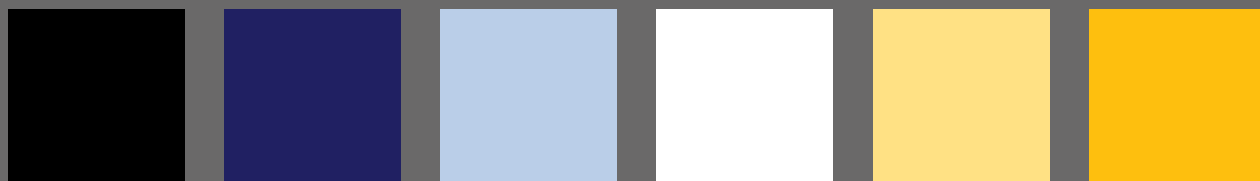

Team Swift Blur gets work done flexibly. Despite differences in our schedule that hinder our progress rate, we can work around them and ensure each team member fulfills their role. In case of any difficulties faced by a team member, the rest of the team are able to fill in their spot and help each other out.

FOCUSED

Much like our mascot – the sharp-eyed falcon, we always have our eyes on the goal. With our clear visions, we know exactly what we aim to achieve and concentrate our focus and effort on achieving that.

TEAM COLORS

Black: This monochrome shade shows our ability to adapt to changes.

Navy Blue: This bold color symbolizes the stability and balance of our team.

Light Blue: This calm color denotes trustworthiness towards our team and our sponsors.

White: It represents our team's nonchalant approach. Just like the color each of us complement the other.

Yellow: Yellow radiates our team's enthusiasm, optimism and positivity in every task we accomplish.

Mustard Yellow: It accents our primary colors and symbolizes creativity and diversity.

RISK MANAGEMENT

Effective risk management isn't just about avoiding risk, it is also about creating a strategic approach to navigate potential risks. It is like a compass that guides the team through the uncertain world of risks.

As part of our risk management strategy, the team met in person and listed out various risks that we could face. We collectively plotted the risks onto a risk matrix, which helped us quantify the degree of risk we face. Below is an example of 5 risks we identified in the meeting.

TEAM SWIFT BLUR RISK MATRIX					
LIKELIHOOD ↓	SEVERITY →				
	Negligible (1)	Low (2)	Moderate (3)	High (4)	Extreme (5)
Improbable 1	LOW 1	LOW (2) Inaccurate simulations	LOW 3	MEDIUM 4	MEDIUM 5
Unlikely 2	LOW 2	MEDIUM 4	MEDIUM 6	HIGH 8	HIGH (10) Violating the rules
Possible 3	LOW 3	MEDIUM 6	HIGH 9	HIGH 12	EXTREME 15
Likely 4	MEDIUM 4	HIGH 8	HIGH (12) Lack of sponsorship	HIGH 16	EXTREME (20) Car issues on race day
Probable 5	MEDIUM (5) Poor technical know how	HIGH 10	EXTREME 15	EXTREME 20	EXTREME 25

Once the risks were quantified using the risk matrix, we used the below risk assessment table as our guiding compass. We came up with a mitigation strategy and contingency plan for every risk identified. Our mitigation strategy was aimed to reduce the likelihood of risk occurring to the lowest extent. In anticipation of any curveballs thrown at us, we prepared contingency plans, which ensured that the team could truly handle anything thrown at us.

TEAM SWIFT BLUR RISK ASSESSMENT			
Potential risks	Risk level	Mitigation strategy	Contingency plan
Inaccurate simulations	Improbable (1) * Low severity (2) = 2	Follow SimScale tutorial correctly	Alternate CFD software
Poor technical know how	Probable (5) * Negligible severity (1) = 5	Learn Fusion and aerodynamic principles well	Seek help from online sources and tutorials
Violating the rules	Unlikely (2) * Extreme severity (5) = 10	Comprehensive regulation checks	Contact the event organizers
Lack of sponsorships	Likely (4) * Moderate severity (3) = 12	Offer attractive sponsorship packages	Optimal use of resources within budget constraint
Car issues on race day	Likely (4) * Extreme severity (5) = 20	Thoroughly inspect the final model	Using backup models

ROLES & RESPONSIBILITY

Effective communication and seamless coordination was of utmost importance to our team. Not only does it help improve efficiency, it also fosters a positive team dynamic. To achieve this, we used a Responsibility assignment (RACI) matrix.

The acronym RACI stands for Responsible, Accountable, Consulted and Informed. RACI matrix was chosen as a project management tool as it provides a visual representation of each member's role within the team.

TEAM SWIFT BLUR RACI MATRIX				
	R	A	C	I
TASK DESCRIPTION	RESPONSIBLE	ACCOUNTABLE	CONSULTED	INFORMED
Team identify	The whole team			
Designing the car	Kaushik	Rahyanath, Aalia	Daniel	Riddhi, Anannya

Team Swift Blur strongly believes in the benefits of a flexible organizational structure and the importance of decentralization. We rejected traditional notions of a rigid 'hierarchy pyramid', in favor of a more fluid team structure. In the fast-paced world of F1 in Schools, such measures not only allowed us to be quick and nimble with our decision-making, it also encouraged communication and fostered inclusivity within the team.

Henri Fayol, the father of modern management, once said, "The intent of division of work is to produce more and better work for the same effort. Specialization is the most efficient way to use human effort."

Following Fayol's advice, our work was distributed on the basis of specialization. We used the above RACI matrix to distribute work among the team and decentralize the decision-making process. This style of management improved communication and interaction between team members. Each member contributed in fields they were both strong in and passionate about. It created an environment where each member played to their strengths, and that made Team Swift Blur feel like a close-knit family, where each member's contributions were valued by all.

QUALITY CONTROL

Key Performance Indicators (KPIs) and Standard Operating Procedures (SOPs) were at the forefront of our quality control framework. Strict and rigid adherence to KPIs and SOPs ensured that all the work produced by Team Swift Blur is of the utmost quality.

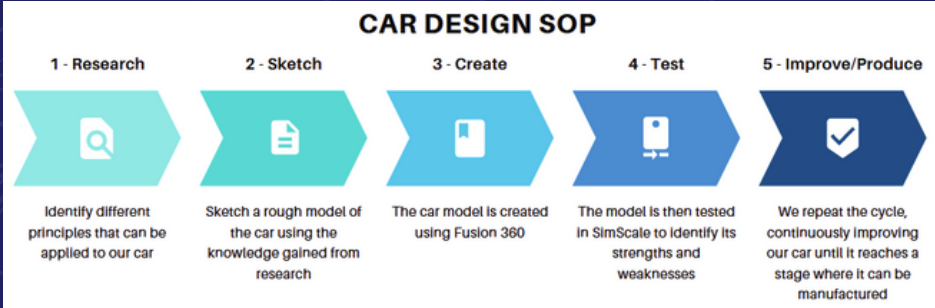

We used task tables to monitor the team's progress in various KPIs and manage time effectively. The usage of task tables gave us a quick visual summary of a wide variety of information, and gave us an idea on how much work we have remaining.

KPI DATA							
TASK TABLE							
TASK NAME	ASSIGNED TO	START DATE	END DATE	DURATION in days	STATUS	RISK	PRIORITY
Car design	Kaushik	23/05/2023	03/06/2023	11	Complete	High	High
Aerodynamics testing	Daniel	25/05/2023	03/06/2023	9	Complete	Medium	High
Regulation check	Kaushik, Aalia	01/06/2023	03/06/2023	2	Complete	High	High
Contacting sponsors	Riddhi	23/05/2023	08/06/2023	16	Complete	Medium	Medium
Social media	Riddhi	23/05/2023	15/06/2023	23	In Progress	Low	Low
Portfolios	Daniel	28/05/2023	07/06/2023	10	Complete	Low	Medium
Pit display	Anannya	25/05/2023	15/06/2023	21	In Progress	High	Medium

Following Frederick Taylor's revolutionary book 'The Principles of Scientific Management', Standard Operating Protocols (SOPs) were implemented. SOPs are guidelines that provide step-by-step instructions on how certain tasks are to be completed. The implementation of SOPs aimed at achieving three main goals: consistency, efficiency and quality in all our above-mentioned tasks. Standardizing tasks ensured that all our work was of the utmost quality.

"Standardization is not an end, it is a means to an end. It is the foundation upon which all efficiency is built, but it is not the ultimate goal. The ultimate goal is to create a system that maximizes productivity, minimizes waste, and allows individuals to work with precision and purpose." - Frederick Taylor

A standardized process is never stagnant, rather, it keeps changing to fit whatever is found to be the most efficient way to accomplish a task. We used standardized workflows that were derived from trial and error. Following a philosophy of continual improvement, our SOPs changed when we identified shortfalls in them. They were then promptly replaced by improved SOPs.

COMMUNICATION

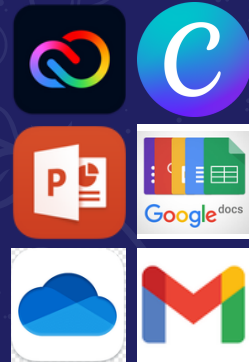

Effective communication is at the core of F1 in Schools. It's not just about designing and building a fast car; it's about collaborating, sharing ideas, and working as a team. Communication is key to ensuring everyone is on the same page, collaborating towards a common goal.

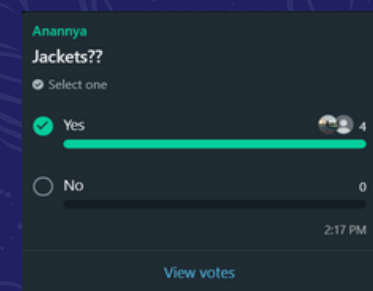

As a team of six 12th-grade students, we faced time constraints that made it challenging to hold regular in-person meetings. However, we used online communication platforms like Google Meets and Zoom. These video call mediums allowed us to have team discussions, ensuring efficient communication despite our busy schedules.

Instant messaging apps like Instagram and WhatsApp facilitate quick communication. While virtual meetings were essential, we knew the importance of in-person interactions. To accommodate this, we worked around our schedules and held meetings in our school's lab at least twice weekly. These meetings were opportunities to discuss our progress, assign roles and responsibilities, and ensure everyone was on the same page.

To maintain organized documentation and effective information sharing, we relied on a shared Google Document, which was a central repository where each team member recorded their daily work and shared ideas. Utilizing a common OneDrive mitigated the risk of losing our work due to device malfunctions, ensuring the safety of our project data. We used Canva and PowerPoint to collaboratively make our presentations and portfolio, and made use of Gmail to keep track of the sponsors we contacted and updates on the deals. Adobe was an immense help in making posts for our marketing on Instagram.

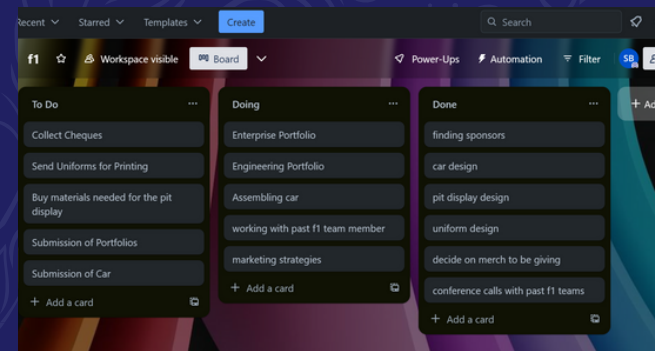

In instances where we encountered differing opinions, we embraced a democratic decision-making process, by conducting polls to arrive at final decisions. This inclusive approach allowed us to make collective choices, fostering a sense of ownership and unity within the team. An example of this was when we deliberated on the design of our team uniforms, utilizing a poll to determine the final selection.

Through open and collaborative communication, we navigated the challenges posed by limited in-person meetings and successfully collaborated as a cohesive team. As a result, we were able to pool together everyone's input and ideas, resulting in the construction of the best possible car and securing sponsorships worth 8,000. Our ability to adapt to various communication platforms and establish clear lines of communication ultimately contributed to our accomplishments in the F1 in Schools Nationals competition.

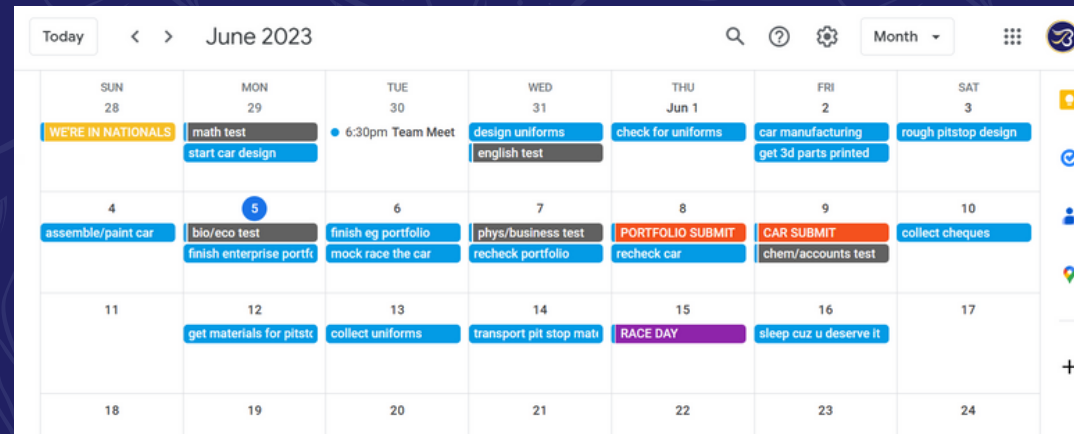

TIME MANAGEMENT

"All time management begins with planning." - Tom Greening

We used Trello to make a list of the tasks we have to complete.

Planning provides direction for action. Carefully planning the tasks to be accomplished each day and the implementation of efficient time management strategies played an important role in determining our progress. Being a group of high school seniors, we faced many challenges in organizing our schedules in a way that meets our deadlines.

We used Google Calendar to keep track of our deadlines

Despite the short time available, each team member was able to balance their academic workload and F1 work, and made a conscious effort to contribute to the team's progress. Using KPI tables also helped quantify the work completed and the remaining work.

Here is a timeline of our journey to the national rounds of F1 in schools:

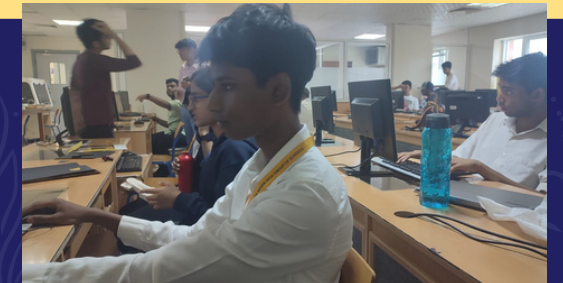

HINDERANCES

TIME CONSTRAINTS

01

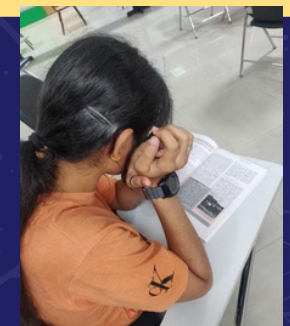

As a team of seniors, we faced time constraints that made it difficult to hold regular face-to-face meetings. To overcome this, we found a common ground and arranged meetings in our school's lab at least twice a week. These in-person meet ups allowed us to assign roles and responsibilities, discuss our progress, and strengthen our unity and alignment as a team.

SCHOOL COMMITMENTS

02

The duration of the event coincided with our mid-terms. With academic obligations and other school-related tasks, balancing the demands of studying for the tests alongside meeting deadlines for the F1 events proved to be difficult. However, by effectively managing our school commitments, we ensured that we could allocate dedicated time to our project.

LACK OF RESOURCES

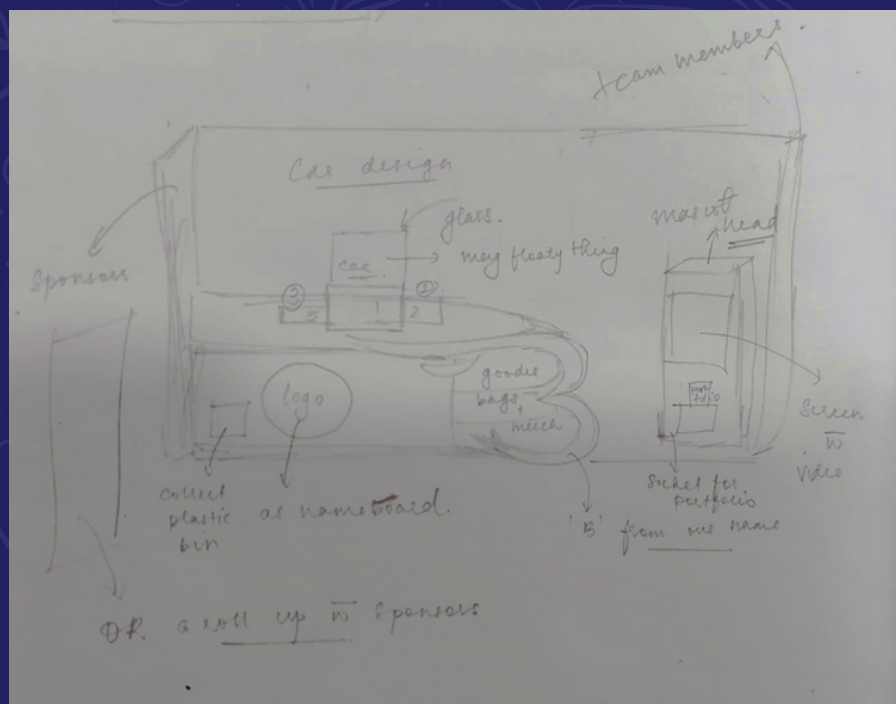

03

We faced challenges in finding the required equipment needed to bring our vision to life. Limited access to specific technologies, like the PRO versions of apps, made it difficult to execute certain aspects of our plan. However, we approached this challenge with creativity, resourcefulness, and making the most out of the available resources.

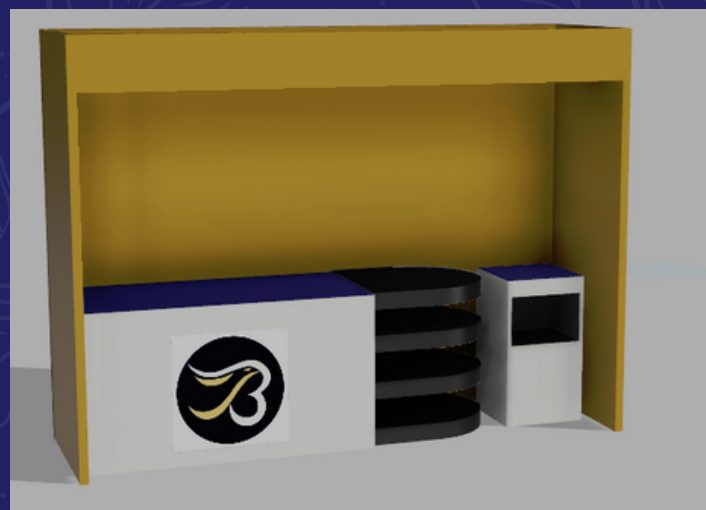

THE ORIGIN

It is within the boundaries of imagination that the infinite possibilities of creation unfold. Our pit display started out as a bunch of doodles on a piece of paper. Over time, our graphic designer turned those doodles into one final sketch of how she envisioned our pit display to look like.

The original pit display sketch

Her final sketch included details of the various items to be included in our pit display, like charts, goodie bags, merch etc. This sketch was the first concrete step taken towards developing our final pit display, and served as a base upon which future changes were decided. Once this sketch was made, a very basic model of the pit display was made in Fusion 360. This helped us conform with the dimensions of the pit display stall that will be available to us at Yas Marina.

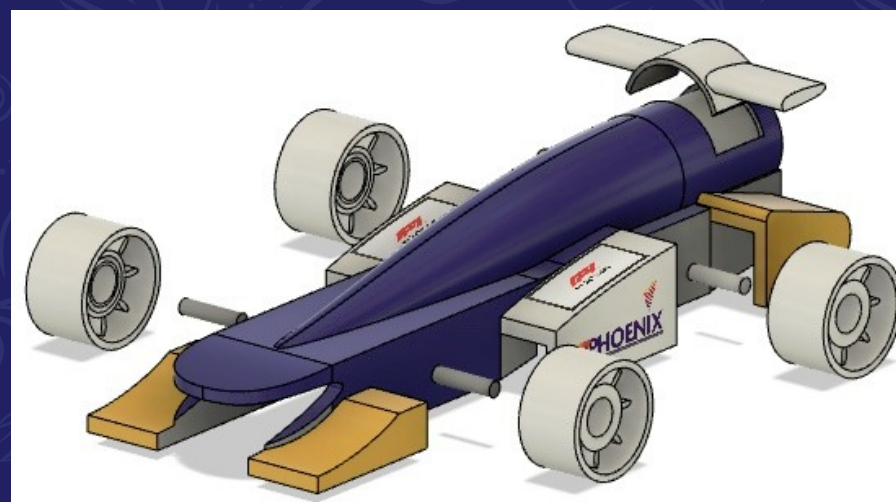

Body of pit display recreated in Fusion 360

DESIGN ASPECTS

Our pit display at the intra school round was unique, and it attracted a lot of attention. The audience loved how we used banners and feathers in our pit display. Although we had a good pit display, there were certainly aspects of it that could be improved, like the introduction of goodie bags and using custom tables.

Since our intra school pit display had a lot of positive elements to it, such as sustainability and creativity with the mascot, we decided to keep those design elements. We incorporated what worked from our intra school pit display and added elements we couldn't do better with.

Our national round pit display features two tables, one rectangular table and one table with a B-shaped edge. The rectangular table will be used to display content via a monitor, and also houses Rambo, the mascot's head. The second table will feature a 3D B-shaped sign, referencing our logo. This table also has racks for merchandise.

Monitor will display videos, like this video of the burst view of Celeritas

Our merchandise mainly consists of goodie bags. These goodie bags are reusable drawstring pouches. Inside the pouches, you can find a nice cookie to keep you going through the long and tiring day at nationals, a sticker of our logo, and a magnetic badge of our logo. Finally, the good bag also has a good luck note made of reused paper, to wish our competitors good luck and a fair competition. We'll also be giving away tote bags as merchandise, to encourage participants to ditch plastic bags in favor of more sustainable alternatives. Lastly, our merchandise will also include items such as notebooks and pens given by our sponsor Suzuki.

The B-shaped table will also have a pedestal, showing the progress between our 3 car models. This gives the viewers a physical experience of how we've improved our car design from Celeritas to Elytra. The 3 walls of the stall will accommodate three posters, one for our car, one for sponsors, and one poster about our team members.

To show our commitment to sustainability, we will have pots with soil at our pit display. Seed pencils will also be available. Seed pencils are a type of environmentally friendly pencils that contain seeds inside. These pencils are used as a normal writing tool, but once they have been used and sharpened, they can be planted in soil to germinate and grow plants. It is a simple yet effective way to encourage everybody participating to plant more trees. After all, if you've got the seed and the soil, what is stopping you from saving our planet?

Intra school round pit display

OUR SPONSORS

Sponsor money is an indispensable part of the F1 in Schools competition. The funding we've received from our sponsors has wisely used to design an amazing pit display, manufacture the car, and get team uniforms. Team Swift Blur would only be a thing of dreams if it was not for the sponsor money which has helped us go the distance in this competition.

SIGMA Middle East Labels

Sigma is one of the leading manufacturers of self-adhesive labels in the United Arab Emirates. They have been in the industry since 2010 under the ownership and care of Mr. Jagannath M Wagle. The company has established itself as a reputable printer throughout with outstanding customer service and a promise of satisfaction. They gave us AED 5,000/- as financial aid.

SUZUKI Motor Corporation

Suzuki Motor Corporation is a Japanese multinational corporation. They are a global player in the automotive industry. The company also manufactures automobiles, motorcycles, marine engines, and other small internal combustion engines. They provided us with AED 3,000/- in monetary aid and merchandise for pit display.

East West Star Trading

Founded in 2022, East West Star Trading is committed to providing high-quality consumer products that enhance your daily life at an affordable price. Since our intra-school round, East West Star Trading has been our no.1 supporter. Their financial contribution carried forward with us to the Nationals. They gave us AED 3,500/- as financial aid.

Gain Access

GainAccess Sports and Entertainment provides the finest world-class sports and entertainment experiences for high-net-worth individuals and businesses. By combining their dedication to excellence, fair play and inclusivity, they go an extra mile to deliver an unrivalled, premium experience from start to finish. They gave us AED 2,500/- as financial aid.

Design Cave

Design Cave tailors to a wide range of industries to add value by creating higher business agility through 3D Design and Printing prototypes when you want, at lower costs and a higher turnaround period. While Design Cave's assistance didn't involve financial support, they generously aided us by printing the 3D parts for our car at no charge.

SPONSORSHIP PROPOSAL

BRAND EXPOSURE

Irrespective of the magnitude of the deal, sponsorships play a significant role in boosting brand awareness and visibility. They serve as means to promote products and services in the markets, expanding their reach and impact.

INVESTMENT IN YOUTH

Through your sponsorship, you provide crucial support to our team, enabling us to advance to the next stage of the F1 in-school program and move one step closer to achieving our dreams.

WE ARE PASSIONATE

Our unwavering commitment to our goals sets us apart from our competitors. Should you decide to sponsor us, we have full confidence that we will make the most effective use of the funds provided, resulting in exceptional outcomes.

SPONSORSHIP PLANS

	KESTRAL AED 2000 - 2999	MERLIN AED 3000 - 3999	PRAIRIE AED 4000 - 4999	PEREGRINE AED 5000+

DATA DRIVEN ROI - APPROACH

We are very grateful for the investment our sponsors have put in us, therefore, we've put in a great deal of hard work to ensure that our sponsors get the most Return on Investment (ROI). After doing our research, we decided to implement a Data Driven ROI strategy.

WHAT IS DATA DRIVEN ROI?

It is a marketing approach wherein data regarding ROI is collected and analyzed.

After analysis, measures are taken to improve and optimize ROI. Using data analytics, we were able to take strategic decisions based on objective data to improve return for our sponsors.

Our experience with Amazon inspired us to utilize data driven ROI. Amazon uses data to optimize a host of operations, from personalized user recommendations to dynamic pricing. Amazon's use of data has truly improved user experience for us, hence, we took inspiration from Amazon's data strategy.

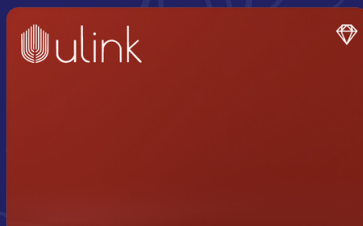

MARKETABILITY

Besides coming up with an effective marketing strategy, we focused on improving Team Swift Blur's marketability. While a marketing strategy can pave the way, marketability sets the stage for success. A key component of marketability is differentiation. Prove that your team is different, and people will pay attention. We did this in two ways:

SUSTAINABLE TECHNOLOGY

Sustainability is an important part of our team. To show our commitment to sustainability, we've made our mascot Rambo out of reused newspapers and cardboard. Seed pencils, which can be grown into a variety of plants, will be distributed at our pit display as merch.

While sustainability is indispensable in the modern world, Team Swift Blur has taken it one step further and incorporated the use of sustainable technology. Through a partnership with a student owned business, ulink, we used NFC cards as part of our pit display. NFC cards are sustainable as they reduce paper wastage, consume very low power and are reusable.

COMMUNITY OUTREACH

As part of the WHEN program at IHS, where seniors teach younger students, we enrolled for the technology and coding classes. The objective of this was to increase technical awareness in the school and to promote F1 in Schools to the younger students.

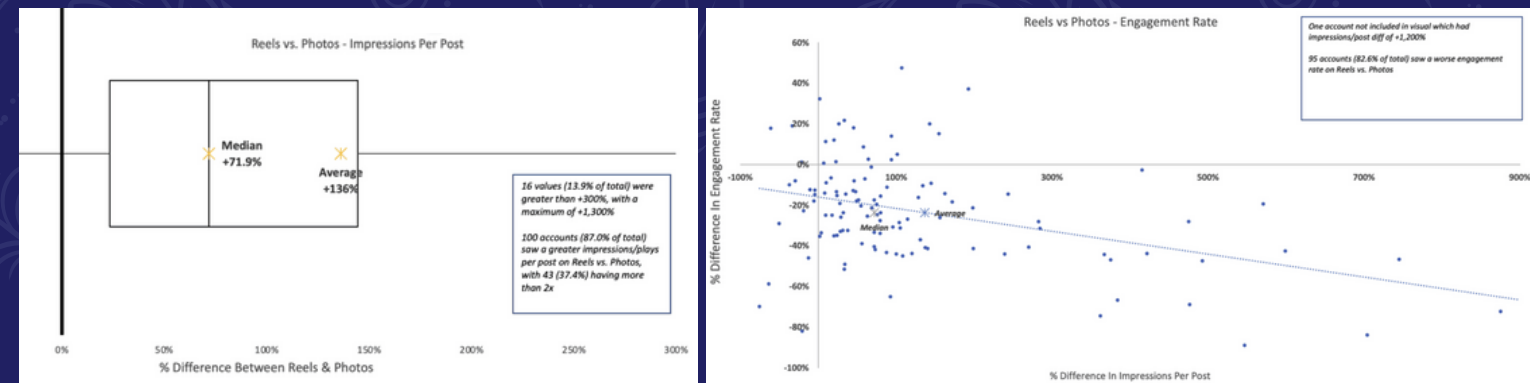

Our marketability strategy created a positive brand image for Team Swift Blur. This improved the team's reputation, and as such, various companies wanted to be associated with the identity of Team Swift Blur.

DATA DRIVEN ROI - IMPLEMENTATION

The first step was to identify our target audience and how we can tailor our marketing to focus on them. To understand more about our target audience, we conducted an analysis and came up with the following results.

Audience	IHS Students	F1 in Schools competitors	General audience
Group characteristics	Students, 13-17, share a close bond with team as they are from the same school	Want to learn more about the team, focus more on the competitive aspect	Have little to no idea about F1 in Schools, cares more about general content
Marketing focus	Show us doing well, strengthen school spirit	Show our progress throughout the competition	Show more humorous content
Tailored content	School specific content, especially during the intra school round	Content focusing more on technical aspect, like manufacturing and test races	Incorporate humor into content to make it enjoyable for a regular viewer

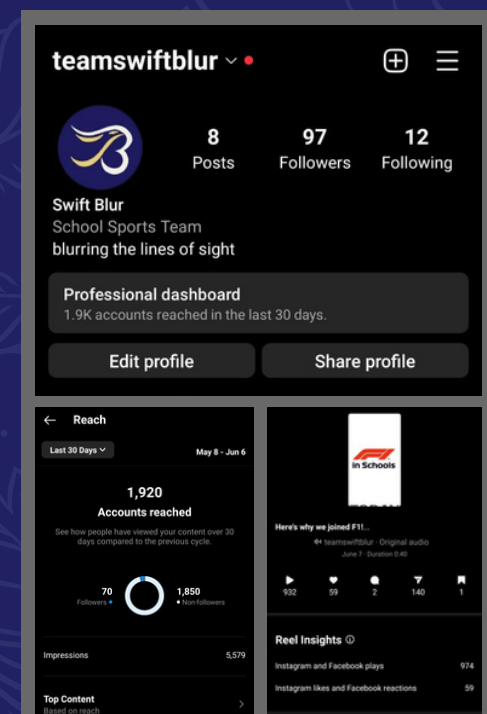

Our primary marketing platform was Instagram. It was chosen due to its ease of access and widespread reach, enabling us to connect to global audiences, usually of our age group. But how did we implement data driven ROI to optimize our sponsor's return? It started off by conducting general research onto how to improve total impressions and engagement rate. These were two KPIs we focused on for social media. According to a study by Geoff Blosat et al. analyzing 32,000 posts, this was their conclusion:

From this study, we learnt that while Instagram Reels has 136% more impressions on average, it had a 24% worse engagement rate than photos. This is because Reels rely on a recommendation algorithm, whereas posts are almost exclusively only from accounts you follow.

With this information, we devised a strategy of using posts to interact with the 'IHS Students' demographic, who most of our followers comprised of. Reels were used to expand Team Swift Blur's reach into global audiences, while at the same time promoting F1 in Schools and all our sponsors. Using both posts and reels helped achieve an equilibrium of impressions and engagement.

In conclusion, our unique and creative approach to marketing to three key demographics using Instagram and Data Analytics proved to be a resounding success. With relatively nominal investment, our sponsors were able to reach a huge global audience of 2,000 and counting. Not only did Instagram help expand our sponsor's reach, it also served as a catalyst to inspire the next generation of aspiring champions to compete in the F1 in Schools program.

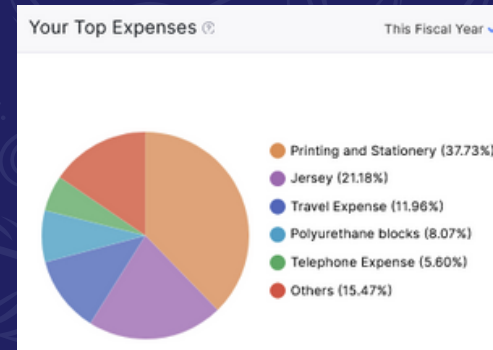

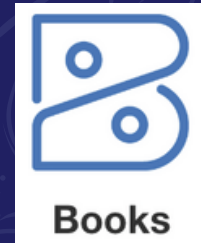

<https://teamswiftblur.wixsite.com/swift-blur>

teamswiftblur

ACCOUNTING

We used Zoho Books to keep track of all expenses and incomes of Team Swift Blur. Zoho Book is a cloud based accounting software created to help simplify the bookkeeping process. It proved to be a reliable way for our Resource Manager to monitor various financial aspects of the team. Using Zoho Books, he was able to monitor how much cash the team had left over in real time. The 'Reports' tab provided us with 3 very important financial statements: Profit & Loss Account, Balance sheet, and Cash flow statement.

Profit & Loss A/c summarizes the team's net earnings, balance sheet showed how many assets and liabilities the team has, while cash flow statement provided us with a live balance of the amount of cash we presently have. The presence of a wide array of financial information allowed the team to always take decisions keeping in mind the financial situation of the team.

Team Swift Blur
Balance Sheet
Basis: Accrual
As of 07 Jun 2023

ACCOUNT	TOTAL
Assets	
Current Assets	
Cash	
Petty Cash	8,095.78
Total for Cash	8,095.78
Total for Current Assets	8,095.78
Total for Assets	8,095.78
Liabilities & Equities	
Equities	
Current Year Earnings	5,905.38
Retained Earnings	2,190.40
Total for Equities	8,095.78
Total for Liabilities & Equities	8,095.78

The balance sheet gives us an at-a-glance summary of the financial situation of Team Swift Blur. The team had AED 2190.4 left over from the intraschool round. This amount was carried over as retained earnings.

Having retained earnings provided the team with a solid base, however, it was not enough to fund the team for the national rounds. The balance sheet showed us the total cash balance we had remaining, and helped keep the team's finances in check.

Team Swift Blur
Profit and Loss
Basis: Accrual
From 01 Jan 2023 To 31 Dec 2023

ACCOUNT	TOTAL
Operating Income	
Sponsorship	9,000.00
Total for Operating Income	9,000.00
Cost of Goods Sold	
Car expenses	0.00
3D printing	352.00
Bearings	506.12
Polyurethane blocks	240.00
Total for Car expenses	1,098.12
Total for Cost of Goods Sold	1,098.12
Gross Profit	7,901.88
Operating Expense	
Pit display	1,875.00
Pit accessories	100.00
Total for Pit display	1,975.00
Travel Expense	21.50
Total for Operating Expense	1,996.50
Operating Profit	5,905.38

The team's Profit & Loss account gives a summary of revenue earned (i.e., sponsorships) and various expenses incurred by the team during the national rounds. It provided us with a clear picture of whether we were making a profit or a loss.

Most importantly, the Profit and Loss account enabled the team to exercise financial control by monitoring and managing our expenses. It also raised financial awareness within the team. It showed the team the financial implications of their decisions and fostered an environment of financial discipline.

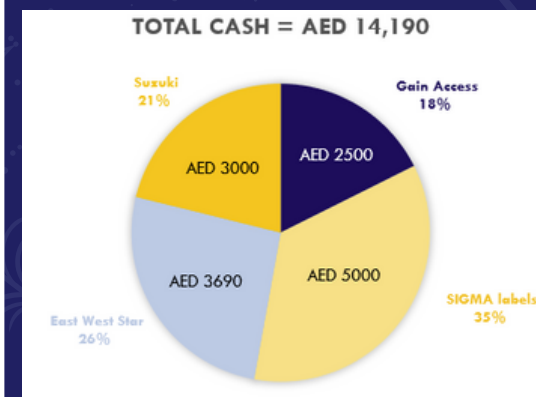

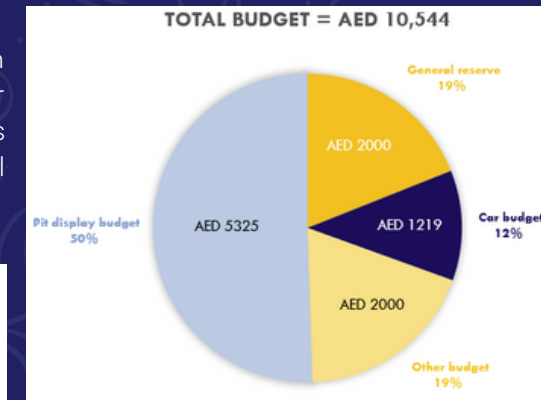

BUDGETING

Our resource manager planned out a budget by taking inputs from each member on how much they estimate will be needed for completion of their assigned tasks. The estimated amount was carefully estimated using knowledge gained from the intra school round and known prices in local shops.

Car budget		
Item	Amount	
3D printing	AED 500.00	
Painting	AED 300.00	
Bearings	AED 250.00	
Polyurethane blocks	AED 144.00	
Glue	AED 25.00	
Total	AED 1,219.00	

Pit display budget		
Item	Amount	
Custom tables	AED 2,500.00	
Pit accessories	AED 750.00	
Pedestal	AED 600.00	
LED lights	AED 400.00	
Merch	AED 350.00	
Miscellaneous	AED 300.00	
Goodie bags	AED 250.00	
Posters	AED 125.00	
Charts	AED 50.00	
Total	AED 5,325.00	

Other budget		
Item	Amount	
Jackets	AED 1,000.00	
Jersey	AED 400.00	
Transportation	AED 300.00	
Caps	AED 200.00	
Telephone cost	AED 100.00	
Total	AED 2,000.00	

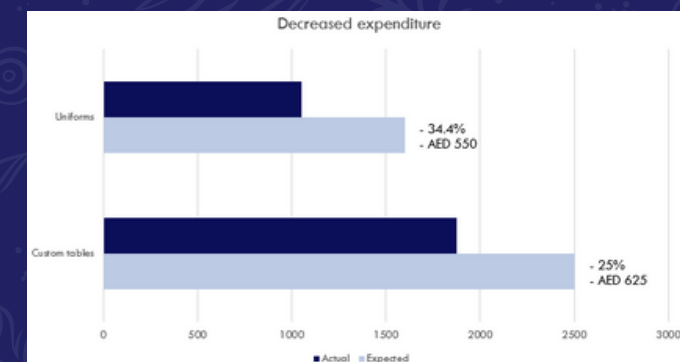

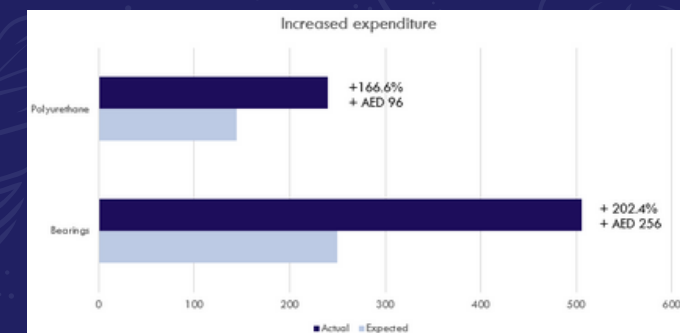

Our marketing and sponsorship manager managed to attract enough sponsorship to cover the total budget. Thanks to her efforts, we got 12,000 AED in sponsorship for the national round. Couple that with the retained earnings from intra school round, and we have just over 14,000 AED to work with.

The total amount of cash from sponsorships meant we had AED 3,646 more than our anticipated budget. When you account for the fact that AED 2,000 of our budget was a reserve fund, we could go up to AED 5,646 over our budget. This meant we were well-prepared for any unexpected expenses thrown our way.

However, not every expense went as it was planned. While some expenses were nearly identical to their predicted values, there were a few expenses that were way off their predicted values. We used AED 575 of our general reserve to account for unexpected expenses, like increased cost of bearings and polyurethane blocks.

Through strategic vendor selection, we were also able to bring the cost of uniforms and pit display tables down by 34% and 25% respectively. Just the amount saved on these two expenses gave us AED 1,175 more to work with. Since the team operated on a surplus budget, it gave us more flexibility to spend more on causes that we support, like sustainability.

Overall, the application of the "Prudence Principle" of accounting ensured we always had more money than what we needed, keeping Team Swift Blur in a financially secure position at all times.

There were instances of both spending more and less than expected

PERFORMANCE EVALUATION

The intra school round was a great learning experience for us. Soon after the intra school round, we held a team meeting to conduct an evaluation into our performance. The goal of this evaluation meeting was to list down all the things we did well, and things we could improve upon for nationals. Despite winning intras, we identified numerous areas where we could improve for the national round.

Legendary football player Thierry Henry famously said, "Don't sleep on what you did before, because it cannot hurt you, but if you dare to progress then there is always room for progression."

The above quote by Thierry Henry resonated with us. In our evaluation, we were brutally honest with ourselves. It is the courage to face your weaknesses, acknowledge your mistakes, and challenge your limitations which helps you hit your full potential. One must confront the truth if he wishes to grow, improve and strive for greatness. Using self-reflection and our honest opinion on our intra school round performance, we came up with the following evaluation table:

Area	Strengths	Weaknesses	How did we improve?
Time management	Team got together when it was crunch time and got the work completed	Slacking off at the start led to a lot of work being piled up right before the competition deadline	Laid out a time management plan from the very start, most tasks were completed smoothly without delays
Research and Development	Used online articles to learn more about ideal forces on a F1 in Schools car	Did not use much research, most changes were made using intuition	In depth research was done, every change was justified using graphs and CFD results
Car design	Strong design skills helped, and good engineering knowledge helped us make a solid car that placed first	Poor manufacturing quality and material choice led to issues with Celeritas	Effective application of CFD software to design a better car, research oriented material choices
Pit Display	Attractive pit display that included merch and showed our commitment to sustainability	Pit display explanation could be worked upon	Prepared a pit display explanation beforehand involving all members, integrated the use of sustainable technology
Portfolios	Included all the important details that a portfolio must include as per scorecard	Lacked any extra information, used a large font size and big pictures	Well documented work described in detail, includes a good balance of picture and font size
Verbal presentation	Interactive presentation made using Prezi impressed the judges	Exceeded the time limit, leading to point deductions	Rigorous rehearsal of presentation to ensure we stay below the time limit
Marketing	A strong and dedicated fan base was built up in the school	Lack of any marketing outside the school itself	Data driven ROI strategy focused on getting global attention for the team via Instagram reels and photos

In conclusion, our performance in the intra school round was great, but there was certainly a lot of room for improvement. We have successfully addressed these shortcomings, and are now a much better team than we once were. We are now confident in our enhanced abilities and ready to showcase our competitiveness in the national rounds of the F1 in Schools competition.

CAREER SKILLS GAINED

We've learnt that in the real world, nobody can do it all. Teamwork is paramount. The management techniques used showed us that when accomplish goals working as a team, we can produce truly wonderful results.

TEAMWORK

To come out on top, critical thinking is essential in every aspect of this competition. From innovative car designs to creative ROI packages for sponsors, we've used critical thinking to elevate Swift Blur to another level.

CRITICAL THINKING

We have faced so many unforeseen challenges throughout our journey with F1 in Schools. However, we remained unfazed. In the face of adversity, the team put their minds together and came up with ingenious alternatives.

ADAPTABILITY

WHAT WE LEARNT

ACCOUNTABILITY

One of the core values of our team was accountability. Using RACI matrix, team members took accountability for task completion. We also stayed transparent with each other, collaborating well and supporting each other.

SOFT SKILLS

The competition has helped each of us in the team build upon our soft skills as we were required to form good rapport with team members, establish a network with sponsors, and maintain trust.

CONFIDENCE

Achieving objectives created a positive momentum, motivating us to do more. Our collective efforts to better what's right and rebuild what's wrong helped us gain confidence to accomplish positive outcomes.
